EDUCATION

University of Toronto Scarborough

Toronto, ON

Honours Bachelor of Science (Co-op) in Computer Science

2024 – Present

- **Specialization:** Software Engineering
- **Relevant Coursework:** Software Design (CSCB07), Data Structures & Algorithms (CSCB63), Software Tools & Systems Programming (CSCB09)

PROJECTS

Music4You | *Next.js, TypeScript, PostgreSQL, Supabase*

Dec 2025 – Present (Ongoing)

- Designed and developed a full-stack music review platform with secure authentication, protected routes, and persistent data storage.
- Implemented RESTful API routes and integrated them with frontend state management for seamless client-server interaction.
- Architected normalized PostgreSQL schemas for users, albums, ratings, and reviews, enforcing data integrity and relational constraints.
- Built reusable frontend and server-side TypeScript components to support scalable, maintainable feature development.

SmartAir | *Java, Android SDK, Firebase Firestore, Firebase Auth*

Sep 2025 – Dec 2025

- Collaborated in an agile team of 5 to design and implement a multi-role asthma management Android application.
- Led development of daily symptom tracking features, persisting structured health data to Firestore with timestamped models.
- Implemented a history browser using Firestore queries to filter multi-month health logs and support PDF/CSV export for providers.

Ez Form (HackHive 2026) | *FastAPI, React, TypeScript, Python, Google Gemini API*

Jan 2026

- Designed and built a voice-driven web application in a one-day hackathon to enable keyboard-free PDF form completion, coordinating frontend and backend integration under tight time constraints.
- Developed a FastAPI backend to extract, track, and update PDF form fields using session-based, multi-step workflows.
- Integrated Google Gemini API to translate spoken user input into structured PDF field updates, improving accessibility.

EXPERIENCE

Data Entry Volunteer

2023 – 2025

Wellspring London & Region

London, ON

- Worked collaboratively within a 3-member team to identify and resolve data discrepancies, contributing to a ~70% improvement in overall database accuracy.
- Recognized by supervisors for consistent accuracy and reliability while handling sensitive data supporting programs for cancer patients and their families using Salesforce, Raiser's Edge, and Excel.

TECHNICAL SKILLS

Languages: Java, TypeScript, Python, JavaScript, SQL, HTML/CSS, C, C#

Frameworks: React, Next.js, FastAPI, Node.js, Android SDK

Databases: PostgreSQL, Firebase Firestore, Supabase

Tools: Git, GitHub, Linux, Jira, Jest, JUnit, VS Code, Visual Studio

Concepts: Object-Oriented Programming, RESTful APIs, Software Design Principles, Agile Development

Other: Bilingual (English & French)

Technical Interests: Full-stack development, backend systems, mobile applications, accessibility-focused software, AI-assisted user interfaces
